

2023 Crystal Valley Fall Grain Policies

The following Grain Policies are in effect as of 09/15/2023; but remember, this can change at any time, and we will try to provide advance notice of any changes.

There is a 10-day grace period for delivered grain. If you know how you want your bushels applied at time of delivery, please give instructions to your driver so he/she can let us know. If you are undecided on what you would like to do at that time, the grain will be put into open storage until we are notified. If the grain is not priced within 10 days of being delivered, storage will be charged from the date of delivery.

Reminder: as in the past, there is no averaging of corn or bean discounts.

Storage charges on both corn and soybeans will be \$.00164 per bushel per day or \$.05 per month for DP and \$.002333 per bushel per day or \$.07 per month for open storage or warehouse. There will be a \$.15 minimum charge on all grain stored in open storage or warehouse and for grain placed on DP. The minimum charge will cover the first 90 days and daily storage will begin after the initial 90 day period. Grain Bank corn delivered at harvest time will have no storage charges for the first two months and \$.05 per month charge after two months. A maximum of four months of projected grain bank corn usage will be allowed. A two-day notice will be needed if a warehouse receipt is requested.

Corn drying charges will be \$.0275 per bushel per 0.5 point of moisture over 14% for open storage and warehouse receipt, and \$.0275 per each 0.5 point of moisture over 15% for cash, delayed price, grain bank and contracted. Shrink is 0.7% per 0.5 point of moisture.

Soybean moisture discounts will be 1% shrink per 0.5 point of moisture at 13.1% and over; 2% of shrink per 0.5 point at 14.1% and over. Beans with a moisture content of 15.1% and over are subject to rejection or a 3% shrink per 0.5 point.

Checks or ACH will be issued only on request. Please contact any of our grain offices if you would like us to settle bushels that have been delivered.

Any grain applied to storage this fall that is not priced by August 31, 2024, will have the storage charges billed to your account. Storage will start accumulating again on September 1, 2024.

Off farm trucking will be ongoing this fall, but we will require a three day notice to help us meet all our customer's requests. We do not haul direct delivered grain at harvest time.

HTA fees effective 09/01/2023;

Corn \$.03/ Beans \$.05 2023 crop year

Corn \$.06/ Beans \$.10 2024 crop year
